

## THE WORLD OVER

BRITISH ACTORS ARRIVE IN B.C.

REVELSTOKE—Armed with boxes of film and a wide assortment of the latest type of cameras, four technicians of the British Gaumont Film Company arrived here from England last week and began preliminary work in the filming of Alan Sullivan's romantic "Great Divide," the story of the building of the Canadian Pacific Railway.

Through arrangement of the Superintendent of the motion picture section of the Canadian Film Council, the British film men will have all possible facilities available at their disposal in their work which will be concentrated for the present time around Glacier. Later they plan to move west to Yoho, in the Fraser Canyon.

## PLAN SURVEY OF BAFFIN LAND

OTTAWA—General scientific survey of Baffin Land and surrounding territory will be made soon by a party of about six men, Thomas A. Manning of London, Eng., said. Mr. Manning, heading the party, gave no details of the survey but said it would be under the auspices of the Royal Geographical Society and the British Museum.

## BULLET OF LEAD MAGNESIUM

Duck hunters who have tender spots in their hearts for their prey will welcome the invention of Professors Robert L. Goss and Ralph Dowell of the University of Minnesota. These two professors have long given thought to the tragedy of ducks which, shot at, manage to escape the death penalty due to the erratic aim of the hunter, yet die a painful death from the bullet. They have found the same shot which whisks them. It seems that ducks, in their search for roughage, frequently eat shot, thereby causing acute indigestion and lead poisoning. The two Minnesota professors have had a deadly high bullet guaranteed to cause a death worse than a very mild attack of indigestion—if it misses, while retaining its deadly qualities if fired by a good marksman. The bullet is made of lead magnesium alloy and dissolves less than 48 hours after being eaten.

## INTERFERENCE BLOCKS PROGRESS

The Douglas-Aberhart squabble still goes on. No doubt there is a misunderstanding some place.

One would naturally think Major Douglas would be tickled to death to have his Social Credit idea adopted. After all, he is the one who is offering today to launch Social Credit. On the other hand we will expect the Social Credit forces in Alberta to leave no stone unturned to get the real trouble between Major Douglas and the government, so that all misunderstandings will be cleared up and Social Credit can be built up from a foundation that will require no tearing down in the days to come.

Should the government proceed without the aid of Major Douglas the Social Credit forces will be in a bind. Social Credit might not, in many ways, dovetail with those of Major Douglas, and naturally will have to be corrected, this being a costly procedure.

The government will be well advised if they prologue the house until such time as Major Douglas can be persuaded to visit Alberta, and lay his original plans for Social Credit. This procedure would eliminate any false moves at the beginning and save considerable trouble.

If Major Douglas does not come to Alberta we can take it for granted that he has found a flaw in the setup of Social Credit and desires to have some one else "wiggle out" from under a very embarrassing situation—The Nanton News.

CARBON, ALBERTA, THURSDAY, APRIL 2, 1938

\$2.00 A YEAR; 5¢ A COPY

## DISCOUNTS ON AUTO LICENSES NOW IN EFFECT

**Motorists** purchasing their auto license for 1938 will receive a discount of 20 per cent of the annual fee if it was announced last week by the provincial government, which stated that the reduction would go into effect on April 1st.

The discount will be operative only on condition that the motorists have not used their cars in 1936 prior to April 1st.

The discount ranges from \$2 for cars with wheelbases not exceeding 10 inches, to \$7 for cars with wheelbases of more than 135 inches. Prices effective on and after April 1st: \$10; \$11; \$12; \$15 inches, \$16; \$18; 120 inches, \$20; 125 inches, \$22; 130 inches, \$24; 135 inches, \$26; over 135 inches, \$28.

The discount will also become effective for cars made more than eight years ago, to a maximum of 15 inches, the wheelbase of which must exceed 120 inches. Fees for these machines will be 100 inches, \$7; 105 inches, \$9; 110 inches, \$11; 115 inches, \$13; 120 inches, \$15.

## HESKETH SPARKLETS

Miss Somber and daughter, Gladys, returned last week after spending the winter in Victoria.

Jack Schlegel thought he foisted us when he said: "no wedding bells." He was married last week to Miss Helen Zeigler, daughter of Jacob Zeigler.

Eric Peterson lost a calf last Thursday and found it in one of the local elevator pits. We have heard of elevators taking your wagon when you get through hauling, but it's the first time we ever heard of them taking a calf.

Mr. and Mrs. Ray Dreser returned last week from Calgary, where they have been spending the winter.

**Lost**—The Hesketh Dance Committee.

A very enjoyable skating party was held at Hesketh last Thursday night.

Frank Clarke is going to start hauling cream to Calgary soon. You milk muids get busy and fill up those cream cans.

A Social Credit meeting will be held in the Hesketh hall on April 3rd.

Mrs. Margaret Thorburn of Kimberley has come to live with her uncle and aunt, Mr. and Mrs. R. Thorburn. She will attend Hesketh school.

## HAUPTMANN GETS A REPRIVE

TRENTON, N.J.—Bruno Richard Hauptmann on Tuesday night received a dramatic 48-hour extension of life in the very hour he had resigned himself to death in the electric chair. The extension was granted by the state's attorney, as the Lithgow killer, Warden Mark O. Kimberley of state prison announced a two-day delay to afford the County Grand Jury additional time in which to investigate what he called "Some interesting new angles in the case."

Now is the time to begin feeding your chickens on colored crayons so they will lay Easter Eggs.

However, We Suggest

PAAS EGG DYES AT 15¢ PKGE.  
OR CHICK-CHICK EGG DYES AT 10¢ PKGE.

EASTER NOVELTIES OF PURE MILK CHOCOLATE

At 3 for 10¢; 10¢ ea.; 5¢ ea.; 15¢ ea.; and 25¢ each.

**McKIBBIN'S DRUG STORE**

## PAID-UP TAXES PROVISION CUT FROM PROPOSED BILL

EDMONTON—Requirement that any candidate for municipal office must have paid up all taxes owing to his municipality before nomination day was struck out of the Municipal Districts Act last week by a surprise motion of the committee of the whole Alberta legislature.

The requirement, set into the bill as an amendment by Hon. Charles Cockcroft as Minister of Municipal Affairs, had been endorsed by the house committee on Monday by a three-vote margin. After a motion to revert to it today the clause was struck out by one vote, 262 to 258.

## DRUMHELLER-EDMONTON ALL-WEATHER HIGHWAY?

The proposed Drumheller to Edmonton all-weather highway, passing through Morin, Bowley, Big Valley, Camrose and connecting with the Camrose-Wetaskiwin highway, was advanced somewhat this week when a delegation of representatives from municipal districts, the city of Drumheller, and the province called on the Hon. W. Fallow, Minister of Public Works, who is the plain dealer at Drumheller. Assurances were given the delegation by the Provincial Minister that the highway would be started this summer, this being the first step toward construction of an all-weather road, after which municipalities along the route would be asked to improve the road while government equipment would be available.

## FARMERS TO GET FAIR TAX REBATE AT PURCHASE TIME

Robots to farmers of the gasoline tax of six cents per gallon will be made at the time of purchase of this fuel, Hon. E. C. Manning, Provincial Secretary, said. This will replace the present system under which it takes from two to six months to get the refunds.

## THANKLESS TASK

We often wonder what prompts a man to permit himself to be cajoled into some kind of a medical examination. It is not necessarily the prestige attached to the office, for an otherwise quiet, inoffensive, good-living citizen becomes a social outcast, according to many and the bulk of every wit and pen in the land. He becomes a councillor, if he drags roads in the summer he is spending too much money; if he doesn't lack of initiative and interest is broadcast far and wide. If he opens roads for winter travel, he is a fool, if he doesn't he is a simpleton, a waste of time, a generation which should have no place in the modern up-and-going world—Alliance Times.

Canada looks towards spring months for the opening of navigation on Great Lakes but the market will be a revival in the international wheat trade and that Canadian supplies will pour overseas in heavy volume. As may be seen by statistics given, world trade has been little above 1934-35, which was considered an abnormally poor year. Even the market of Argentina, the keenest competitor on the export market, and a forcing policy of Canadian sales, has forced an increase of only some 30 million bushels of export over the previous year.

However, the immediate prospects are brighter, for it would appear that Canada is the only source of large supplies of wheat now that Australia has had to cut its production in 1938-39. This should mean that the bulk of international trade will be between Canada and the importing countries until next year.

Deliveries of wheat from the 1935 crop have reached 190 million bushels

## WINTER RETURNS WITH SNOW, ZERO WEATHER

With a cold north wind and driving snow, winter returned to the district last week and zero weather has been prevalent.

On Monday the highways were covered by drifting snow in almost all parts of the province, and the bus between Drumheller and Calgary was unable to make the trip because, although the snow plow got through Monday, the snow had come back Tuesday morning.

After coming in like a lion, March has been a peculiar, yet usual, month. After three weeks of fine weather, which saw almost all of the winter's snow melt away, a cold front came through Saturday night, dropped the snow, returned to cover the surface and block the roads, and winter once more held sway over the land.

The spring work on land will be late again this year, although a late spring usually brings good crops so the farmers are not too worried over the fact that they can't get an early start.

Although not being able to get to work on the land, the farmers are by no means idle, and most of them now have their hay harvested and stored, and are machineing in shape, begin spring operations. Machine dealers are getting busy and all signs point to considerable activity when the weather finally breaks.

## DOMINION LOAN NOT FORTHCOMING TUES.

Premier William Aberhart's Social Credit government in Alberta and the Dominion Government at Ottawa had apparently come to the financial parting of the ways Tuesday night with the result that the former would technically default redemption of the \$2,200,000 bond maturity.

At Edmonton Hon. Chas. Cockcroft, Provincial Treasurer, announced that Alberta would meet in full its interest payments during April. The minister informed the press that arrangements had been completed for the paying of this interest charge.

## CANADA PACIFIC ANNOUNCE BARGAIN FARES TO COAST

Teachers and Students on Easter holidays, and those taking early vacations, will rejoice in the announcement of bargain fares to the Pacific Coast by Mr. Williamson, local Canadian manager.

Tickets will be on sale April 6th to April 11th, inclusive, with 21 day return limit, and will permit stopovers at Banff, Nelson and stations west. A feature of these fares will be the availability of tourist or standard sleepers at unusually high rates and usual berth charge. The special cent-a-mile fare good in coaches will also be available.

# Necessity Is Shown For Improving Quality of Barley Grown In Western Canada

Further stress was laid at the National Barley Committee's meeting in Toronto recently on the necessity of improving the condition of western Canada barley before it could achieve popularity in the east. Tests made on the prairies showed farmers knew little of what varieties they were producing, it was reported. W. H. Crutt, chief inspector for the Dominion department of agriculture, at Winnipeg, said samples of seeds taken from seed drills of farmers disclosed that more than 90 per cent. of the samples were barley in the rejected grades.

In his report as chairman of the sub-committee on marketing, T. G. Major, of the department, and the principal outlets were for malting and feed barley, though complaints had arisen regarding the presence of wild oats and other weeds.

Prof. R. G. Knox, of the Ontario Agricultural College, Guelph, said if growers in the west wanted a better eastern market for barley, they would have to send out a product of a higher grade. The present prevalence of weeds in western barley was a serious handicap to its sale to Ontario hog-ratters for feed.

Prof. Knox said he was not aware of any market in the east that will give quality of grain in a hog's winter color of fat and firmness of finish, as well as barley. In Denmark, Great Britain, South Africa, and other hog-growing countries, barley was graded for the best of all grains for hogs.

An average of 73 per cent. of Canada's total barley production in the last two years has fed livestock on Canadian farms, said a report submitted by W. R. White, chief of the feed division of the Dominion department of agriculture's feed and grain branch. On the report, said, was based the finding that the best of all grains for hogs.

What was required particularly for barley, was more educational effort concerning its merits as feed and better seedsmanship in its behalf. The weak condition of western barley was a serious handicap to its ready sale, Mr. White said.

## Horses Bring High Prices

### Keen Bidding By United States And Ontario Buyers

Farm horses, which reached a low market value during the depression years, are coming back in the picture to stay, and are bringing prices with United States and Ontario buyers keen bidders at rural sales.

Some United States buyers have paid as high as \$600 for a team of horses, and prices, generally, are ranging around \$350 a team.

At the Lacombe, Alberta, sales \$308 horses brought \$25,810, an average of \$83, making a new high since 1929. The record for the highest average was \$68. The highest price was paid by A. Picov, of Audley, Ont., whose agent purchased a team for \$387. The highest bid for a team of mares, however, was \$400, paid by Montreal, which paid \$340 for a team.

Evidence of the demand for horses was provided in an auction sale at Galt, Ont., of 34 western farm animals of good quality that netted over \$1,000. The highest price was \$150, paid for a team of two-year-old pairs of geldings. Buyers came from all over the district, with many animals going to the Niagara peninsula.

## Passed Severe Test

### Radio Guided Fifteen Planes To Airdrome In Fog

Freak fog recently gave the radio control of the remote test site it has ever had. It emerged triumphant.

At one point fifteen aeroplanes were making for the airdrome as the same time.

The men were warned by radio that Croydon was blotted out, and guided by wireless, four of them made safe landings at Biggin Hill, Kent, Lympne, or some other aerodrome.

The fifteenth succeeded in making Croydon.

Its pilot, J. W. Duggan, landed safely when visibility was less than 25 yards and provided Croydon with the sensation of the test.

The gofer had lost his ball, and, though unprepared, was inclined to be unwise with his radio.

"Why the deuce don't you watch were it went?" he asked angrily.

"Well, sir," said the boy, "it doesn't usually go anywhere, and so it took me unprepared like."

## Seems A Bit Queer

### Two Englishmen Mentioned In News Are Rather Unusual

Two Englishmen were mentioned in the news of Old Country papers recently. They were Charles Crutt and Charles Brown. Probably the names don't mean anything to you, but they may interest you.

Charles Crutt is Crutt of Crutt's Dog Show. Mr. Crutt began promoting dog shows more than 50 years ago and from a very small start, has built up his show to be the biggest dog show in the world. The elite of British dogdom is entered at Crutt's and if there are any new breeds of dogs developed—which quite recently they are—there is a good chance that they will be first shown at Crutt's. This month's show had over 10,000 entries.

The queer thing about Charles Crutt is that he isn't a dog of his own.

Charles Brown is the carver at Simpson's restaurant in the Strand, London. That's the place where "The Queen's Messenger" was served at his best. Mr. Brown does the carving in the main dining room. A man may appear before you on a wagon and half an ox on a wagon and choose the carver to do his picture.

If you want two or three more helpings there is no extra charge. But Mr. Brown cuts such generous portions that you will have to ask for another, but he does say that the good old days the trenchermen would ask for four or five "follows." His record carve in one day is 544 plates. There are 100 carvers in London, but Mr. Brown is the only one who is big alike in the centre and the smaller smacks and trimmings built around it.

And here's the queer thing about Charles Crutt. He's not a carver, but a carver's son. It was his 73rd birthday recently, and as a special favor his wife let him carve for the *St. Thomas Times-Journal*.

## Strely Self-Supporting

### Arkansas Farmers Gets Along On Live-At-Home Program

Lee Horton, 53, has been farming on sixty acres of land in Seacry County for the last forty years. His trade is not well recognized and in this respect the National Parks Service for the past 20 years has devoted the 200,000 acre park he has established largely in helping to increase the volume of Canada's tourist business, and in this way has placed these great scenic playgrounds in a foremost position in the economic life of the country.

Horton has live-at-home program to the limit. Horton says he always manages to have a patch of wheat, a field of corn, some sorghum, keeps several hives of bees, five hog pens and has never bought anything, never had a car, in addition to socks, any meal, chewing tobacco, sugar, bacon or tobacco.

A tobacco user all his life, Horton raises his own, and has 20,000 twists of tobacco in his basement. He has not sold a single cigarette in a forest camp since he started his program.

Radiating energy, the sun is gradually losing not only weight but brightness.

Horton declares he started his live-at-home program early in life, in order to have a home and for convenience. He recalls that as a family of five children always had plenty of everything.

"I am sorry that my forty-year record is not perfect," Horton says.

"My wife and I have been married the drought a few years ago," he explains. "I didn't do so well with my hogs and had to buy a bucket of feed to tide us over that year."

## Provides Work For Blind

The blind of Italy have been given a monopoly by the government for the manufacture and sale to municipalities and city governments of hand-woven tapestries. Italy, because of the strength of the hand-woven fabrics, is the world's champion in Europe because it makes provisions for earning their living. There are several other artisan industries in which only the blind may be engaged in Italy.

## Canadian Cereals Popular

Canadian cereal foods find their way to breakfast tables in many parts of the world, according to a report on the preparation and marketing of cereals and other cereal products in Canada. During 1934 exports of cereal foods from Canada amounted to \$32,266,576, of which over 90 per cent. went to the United Kingdom.

The gofer had lost his ball, and, though unprepared, was inclined to be unwise with his radio.

"Well, sir," said the boy, "it doesn't usually go anywhere, and so it took me unprepared like."

# The SNAPSHOT GUILD

At Home With Your Camera

This room has medium colored walls and a variety of tones in the furnishings. Taken at 20 seconds, f/22, lens focused at 15 feet.

Photograph dealers report a substantial increase in sales. Are you numbered among those who have refurnished a room or added new furniture?

If so you should take a picture of that rejuvenated room. Information on the new dining room, bedroom or living room will be welcome to the new nursery.

Don't put off taking these pictures any longer for making them is not at all difficult; in fact you will enjoy it. Here are a few pointers that may help you in making your first shots.

If you take your interior pictures in the daytime the chances are that you will have to take a time exposure with a very fast lens, say f/3.5 or faster. If a time exposure is not possible, then you will have to put off taking these pictures until the next day.

Don't be afraid to make them is not at all difficult; in fact you will enjoy it. Here are a few pointers that may help you in making your first shots.

If you take your interior pictures in the daytime the chances are that you will have to take a time exposure with a very fast lens, say f/3.5 or faster. If a time exposure is not possible, then you will have to put off taking these pictures until the next day.

Avoid including large pieces of furniture in your picture. It will fill up more space in the picture than they deserve.

## BELIEVES CANADA GREATEST MINING AREA IN WORLD

Ottawa—Belief Canada was the richest mineral area on earth which "our grandchildren's grandchildren will not exhaust," was expressed here by Lord Tweedsmuir, governor-general, to the Canadian Institute of Mining and Metallurgy.

Speaking at a dinner closing the three-day meeting of the institute, Lord Tweedsmuir said mining was no longer a gamble except in first stages. It speedily becomes a highly organized business and an exact science. Up-to-date business methods and every new development in metallurgical and mechanical science were being used.

One feature about Canadian mining pleased him. "In most mining areas—indeed, in South Africa—the prospectors who did the pioneering work did not reap the fruits of his labor. That was left to the capitalist who came after him, who never affered from his office chair. But in Canada, the prospector often made the big money, but he has stuck to it."

Mining problems were not new to him, the governor-general said. In South Africa after the war was won, he had to face the same question of the future of the gold industry of the Rand was under consideration.

In the few months he had been in Canada he had visited coal and copper mines in northern Ontario and asbestos mines of Thetford, Que. He hoped to see a great deal more.

"In a wonderful piece of good fortune for Canada that in these difficult days, when agriculture all over the world is in straits and when normal industries are crippled, you should have found the source of wealth which can be as readily cashed as a Bank of England note."

### Cattle Sales Increase

#### Heavier Marketing Of Cattle In Western Canada

Toronto—Heavy marketing of cattle in Western Canada has been increased by stockmen, who for the first 13 months of 1934, Alex. G. Smith of Canada Packers Ltd., told the 38th annual meeting of the Eastern Canada Livestock Union here.

Exports to the United States of beef cattle also show an increase over the same period of 1935 but shipments to the United Kingdom had fallen off from 4,781 head in 1935 to 1,765 up to March 12, 1936, Mr. Smith said.

Stock yards, Mr. Hall said, for the period ending March 12 show a decrease of 12,478 head in Toronto and Montreal but an increase in sales in the western markets. There had been an increase of 2,022 in shipments from the west in that period.

Meeting in convention earlier the delegates decided to appoint a committee to visit the United States to co-operate with a committee from the Western Canada Livestock Union in gathering information and preparing a report with respect to inter-empire trade parts which will be reviewed in 1937.

### Growing In Importance

#### Canada Going Ahead As Industrial Country States Massey

London—Canada's growing importance as an industrial nation was stressed by Sir James Massey, the Dominion's high commissioner to London, at a luncheon given by the Canadian Chamber of Commerce here.

The growing trade between Canada and the United Kingdom "should form a practical demonstration between the two countries of their regard for and interest in each other," and indeed the economic progress in the Old Country.

#### Lord Shaughnessy Dies

Montreal—Lady Shaughnessy, wife of Lord Shaughnessy, Montreal, died yesterday. Before her marriage she was Margaretta Graham, daughter of the late R. K. Graham, Montreal, who was a brother of Lord Atholstan.

#### Roosevelt Asks For Billion

Washington—Congressional leaders were told by President Roosevelt that he would request more than \$1,000,000,000 to continue the work relief program for a full year beyond next July.

### Committee Appointed

#### Investigate Administration Of Radio Act Of 1932

Ottawa—Operations of the Canadian Radio Commission in the administration of the Canadian Radio Broadcasting Act of 1932 will be investigated by a special House of Commons committee of 23 members. Its membership will include 17 Liberals, 4 Conservatives, and one each for the C.C.F. and Social Credit groups.

Announcement of the committee personnel, together with an outline of its reference was made in a report to the House of Commons by Hon. C. D. Howe, minister of marine.

The committee will "inquire into the administration of the Canadian Radio Commission and its implementation of the Canadian Radio Broadcasting Act of 1932 and amendments, and the regulations made under authority thereof; advise what, if any, changes should be made in the existing systems of radio broadcasting; and whether the said statutes and regulations should be amended in whole or in part, and what, if any, changes should be made in the said regulations for the protection of the public."

The committee will also inquire into the extent to which there has been any abuse of broadcasting privileges, either for political or advertising purposes, and to advise as to what principles should govern the regulations or control thereof."

### Canadian Women Honored

#### Selected For Outstanding Achievements In Chosen Fields

New York—Canadian women were among a group of 23 selected for outstanding achievement in varied fields who were honored at the New York League of the National Federation of Business and Professional Women's at dinner.

They were Isabel Stewart, of Fletcher, Ont., and formerly of Morton, Man., professor of nursing education at the University of Manitoba; Margaret Gauthier, of Prince Albert, Sask., who is director of women's activity for the National Broadcasting Company.

The dinner was a part of a national celebration of business women's week, inaugurated last year as an annual event to emphasize the importance of women in art, business and politics.

Miss Stewart trained as a nurse in Winnipeg before going to New York. She is a sister of Dr. David Stewart, superintendent of Manitoba sanatoria.

### King Edward Holds Levee

#### Several Canadian Officers Among Those Who Were Presented

London—Two of the officers who were Canadian at the levee of the late King George V were presented to King Edward when His Majesty held levee at Buckingham Palace March 18, the first full state function of his reign.

Captain G. G. Gledhill, of the Royal Canadian Navy, and Wing Commander S. G. Tackaberry, of the Royal Canadian Air Force, were presented along with a number of other members of the Canadian delegation, Capt. Guy Stinson, Major James Hunter, Capt. K. G. McCullagh, Lieut. M. P. Joly, Lieut. J. A. Bennett and Lieut. A. B. Connell.

Bishop W. T. Hallam, of Saskatoon, as well as Lester Pearson, first secretary of the Canadian high commission's office here, and Ross McLean, were also presented.

### Heads Produce Association

#### W. A. Landreth Elected President Of Recently-Formed Body

Winnipeg—W. A. Landreth, Winnipeg, was elected president of the recently-formed Canadian Produce Association at an executive meeting here.

J. W. Skelly, Calgary, was elected first vice-president, and F. Ironside, of Galt, Ont., was elected second vice-president.

Members on the executive include: J. S. Turnbull, Regina; M. Rudin, Coopers, Sask.; A. J. Chorley, Moose Jaw; F. J. Heffernan, Calgary, and B. Wainberg and B. Stanley, Edmonton.

#### Court Issues Warrant

Calgary—A distress warrant was issued by Magistrate S. B. Arnold, for the seizure of goods and chattels of Rev. T. Dabson, of Tilbury, rural dean of Kent, who a week ago refused to pay a fine of \$1 and \$25 costs for not having a tail light on his automobile. 2143

### Made Excellent Showing

#### Saskatchewan Youth Win In Judging Competition At Banff

Banff—Two Saskatchewan youths made an excellent showing in the students' judging competitions at the Manitoba winter fair here. In a class of more than 50, Jack Parker, of Regina, was among the winning entries in four competitions, and Clifford Shirley, of Carlyle, collected prize money in two.

The competition was held on Jan. 25, and the students' short service contests were conducted here during March by the Dominion Extension Service. Jack Parker came third in the swine and poultry judging class, fourth in the cattle class and fifth in the seed class. Clifford Shirley won second place in the swine class and fourth in the horse class.

### Continuing Long Trip

#### Woman Starts Last Lap To Fairbanks With Dog Team

Tanana Crossing, Alaska—Diminutive Mary Joyce, 27, and her five-year-old dog team, which has run on the last 165 miles of her 1,000-mile mush from Fairbanks to Tanana Crossing.

The Tanana hunting lodge mistress, making the trip "just for the fun of it," was accompanied by an Indian woman.

She will travel the rest of the way alone, as she has most of the time since she left Tanana, Dec. 20.

### EVOLVE PLAN TO SMOOTH OUT THE LOCARNO BREAK

#### London—A French spokesman said that Locarno members have agreed tentatively on a plan to adjust German reoccupation of the Rhineland.

Informed French quarters said the plan's content contains three points forming a compromise between the British and French viewpoints.

The appeal should be made to the Hague court for decision in the Franco-Soviet mutual military assistance treaty.

2. Measures shall be taken to prevent the second importance of Canada and the United States.

3. Guidance of mutual assistance to the remaining Locarno members in case of an attack.

The tentative agreement was reached at a session of Locarno representatives after the former had split on the German issue at a League of Nations' council meeting.

Direct telephone contact will be established between the two cabinet ministers.

Not a dissenting voice was raised against the Franco-British resolution formally branding Germany a aggressor, but both Great Britain and Germany, at least at the time of the signing, had been at war with France.

Winnipeg, March 12—The department of railways and canals was interested in transportation, railways came to a smaller extent, highways and civil aviation.

The department had a program

and now needs to co-operate with the other departments in giving the miners reasonable access to their properties.

#### Derreter From Bihlbad

Mulhouse, France—The first deserter from Germany's new Rhine army found a haven in France after swimming the Rhine.

Exhorted by the German command, he sought a companion, and a youthful Reich soldier staggered up the bank into France near the Huningue railway bridge.

#### BRITISH FILER WINS COVETED TROPHY

Jean Batten, generally conceded to be the most daring and accomplished aviator among the fair sex, is shown above with the coveted International Trophy which she has just been awarded for her solo flight over the South Atlantic Ocean. Miss Batten has made several solo flights across Europe and Asia and has set several long distance flight records.

### KING IN UNIFORM

### Plebiscite Proposed

#### Would Take Referendum Of People Before Engaging In War

Winnipeg—A plebiscite before Canada enters any war except in the case of invasion of the Dominion will be submitted to the Dominion convention of the Canadian Legion at Vancouver by the Winnipeg and district command.

The resolution was passed at the district meeting with representatives of 20 branches in attendance. They represent a membership of 3,000 veterans.

The resolution proposed, should be submitted to the whole population of adult age. In the event of war being declared, after the referendum, all adult citizens of both sexes shall be conscripted to the extent of being paid only the basis of pay and allowances as soldiers.

The manufacture of arms and all war equipment should be taken over by the government permanently in order to prevent private profit, the resolution declared.

### Employment For Veterans

#### Commission Will Be Set Up To Assist In Matter

Ottawa—A commission will be established to assist veterans in obtaining employment for veterans is provided for in a government resolution placed on the order paper of the House of Commons by Hon. C. G. Power, minister of pensions and national health.

The pensions minister has also given notice of legislation amending the Veterans' Assistance Act so as to give special consideration to veterans of 55 and over but not yet 60 who are unable to maintain themselves.

### See Better Tourist Season

#### C.P.R. Offers Predict Increase In Passenger Traffic

Winnipeg—Indications are much better for tourists throughout Canada and for better railway passenger business are observed by C. B. Foster, passenger traffic manager for the Canadian Pacific Railway system, who spent a day in Winnipeg, Tuesday, to discuss passenger traffic.

Mining industry, he told an institute luncheon, had grown until it was of second importance to Canada and Ontario mine departments were zealous in placing needs of the mining industry before the government, he said. The department of railways and canals was interested in transportation, railways came to a smaller extent, highways and civil aviation.

The department had a program

and now needs to co-operate with the other departments in giving the miners reasonable access to their properties.

#### Derreter From Bihlbad

Mulhouse, France—The first deserter from Germany's new Rhine army found a haven in France after swimming the Rhine.

Exhorted by the German command, he sought a companion, and a youthful Reich soldier staggered up the bank into France near the Huningue railway bridge.

Throughout the world, the war that has grown up in the Dominion, which is one of the few countries to impose taxes on commodities of the luxury class, on amusements and in some instances on hotel and restaurant patronage.

These taxes have been collected under the constant possibility that embarrassment might be caused if the province's constitutional right to collect them were challenged in the courts.

It was now proposed to add to section 92 of the B.N.A., the section that deals with particular rights of the provinces, a clause giving provinces the right to impose taxes on articles of retail commerce other than beverages and tobacco and other than those articles sold for delivery outside the provinces; also in respect of patronage of hotels, restaurants, places of amusement and entertainment.

With respect to Dominion-provincial financing the amendment sought would not be limited to giving provinces power to banish the clause, but would also give provinces specific security in the form of collateral such as subsidies annually paid the provinces from the Dominion treasury.

### WOULD CURTAIL ANY INCREASE IN COAL PRODUCTION

Ottawa—Curtailment for the next five years of development work designed to increase production was urged on the government in a report of Sir Montague Barlow, English expert, who investigated the province's coal industry last fall.

Sir Montague, in the course of recommendations calling for increased production, fixed a maximum for a period of five years, improved marketing and working conditions and publicity, advised the government to refuse to grant new leases of mineral areas during the period suggested.

Hon. C. C. Ross, Alberta minister of lands and mines, in the course of a recent real estate meeting of the Canadian Association of Mining and Metallurgy, made public a summary of the report. Sir Montague came to Canada last fall under an arrangement entered into by the former Undersecretary of Government of Alberta which was replaced by the Social Credit administration before the inquiry opened.

Coal, natural gas and petroleum are the principal mineral resources of Alberta, constituting 70 per cent of the total. Coal production is increasing. Mr. Ross said the output in 1935 being 5,462,973 tons, an increase of 13 per cent. over the previous year.

Of the total output 28 per cent. is consumed within the province, 15.7 per cent. in other provinces, 36.9 per cent. sold to railways, and the rest is shipped into territories with a small amount exported to United States.

The Barlow report urged the provincial government not only to renew coal leases for the next five years but to make arrangements with those holding undeveloped mineral areas releasing them from the obligation of starting active operations until a specific time, and that within a specified time, or on specific conditions, to resume production.

These restrictions would not apply to bona fide development of existing mines which would be carried out in the ordinary course of mine operations.

### May Set Up Harbor Board

#### Would Replace Commission Control Of Leading Canadian Ports

Ottawa—Statutory confirmation of the central harbors board set up last fall to replace the commission control of the seven leading Canadian ports is provided in a bill presented to the House of Commons by Hon. C. D. Howe, minister of marine.

A body to be known as "the marine commission" will be established with full powers and financed by the Dominion government, is contemplated in the measure. The board will control at once the harbors of Halifax, Saint John, Vancouver, Quebec, Three Rivers, Montreal and Vancouver. Other harbors may come under its jurisdiction later.

### Early Start On Land

#### Alberta Town Sets Record With First Official Report

Winnipeg, Man.—Barewell, Alberta, has set a record by sending the first official report of a town on the land, according to a message received by the agricultural department of the Canadian Pacific Railway.

Spring cultivation and harrowing are being started at this point by the Lethbridge division of the C.P.R., just five miles from Taber, which has held the record for some years. First reports in 1935 came from Taber on March 21.

No plowing is reported on the prairie.

#### Sailor Killed By Explosion

Gibraltar, -- A British sailor was killed and eight others, including an officer, were injured when an incendiary explosion occurred aboard the 1,100-ton destroyer Westcott during fleet exercises in the Straits of Gibraltar. Authorities declined to give further details of the accident. All the injured were placed in a military hospital here.

#### Momt's Horses For Sale

Regina.—The regular spring cast, eight geldings and two mares, will be sold at public auction April 16, has been announced. Whether any purchases will be made to replace the horses has not been decided.

## Cadmium In Canada

### First Output Recorded From British Columbia In 1928

Cadmium may be classed as one of a few metals, the consumers of which, with the exception of a few, are concerned as to the supply. A by-product in the production of zinc and in some cases of lead, cadmium has been produced, especially for these last two years, but its commercial uses were greatly restricted until a few years ago, when new uses were developed and its former fields greatly extended. In 1928 the demand was so keen that the price rose from 25 cents a pound in January to \$1.05 a pound at the close of the year.

The sharp price rise and the rapid increase in the use of the metal have focused attention on the production of it in Canada, however, dates back to 1918, when the first output was recorded in British Columbia. Only two enterprises produce the metal in Canada, and both companies obtain their output from the treatment of zinc refinery residues.

The increase in the demand for cadmium during the past two years is due mainly to its use in plating metal for rust protection and to its rapid increase in the production of heating alloys for the motor industry. The use of cadmium copper alloy for tramway and railway trolley wires is also increasing, and the metal is also being exported for overhead telephone and telegraph lines; for flexible telephone cords and similar cables, and for the electrodes of electric welding machines. A cadmium-copper alloy containing from 6.5 per cent. to 1.0 per cent. cadmium is being introduced for long span, high voltage, transmission lines. The metal also finds application in the arts, medicine, and in the dyeing industry.

### Bird Held Up Traffic

#### Line Of Trolleys Waited While Driver Caught Canary

A flying canary started a trolley and caused a remarkable traffic jam in Vienna. The bird was standing on a tram-line. Just as a tram was about to run over it, the driver applied the brakes and held up a terrific jerk which threw the passengers inside from their seats. Then the driver jumped down and tried to catch the canary in his cap. The bird escaped away. The driver followed him and the bird hopped on. By this time traffic in the busy street had been brought to a standstill, and a long line of trolley cars was waiting to pass. The driver pursued the canary, and still the little bird managed to hop away. At length, amid the cheers of his passengers, the driver caught the bird, just in time to hand it to its owner. The bird was then released down from her tail overlooking the street. Then after sprints and bows all round the driver got back into his tram and the traffic started moving again.

### Growth Of Life Insurance

#### Amount Of Insurance In Force In Canada Has Increased Eight Times Since 1900

The tremendous growth of the life insurance business in Canada during the last 25 years has been in very large measure due to the unremitting zeal and conscientious efforts of a great body of men and women insurance throughout the country. The fact that life insurance in force in Canada has increased in amount eight times during this period, so that the Dominion ranks third in the world in the amount of life insurance throughout the country, is largely attributable to the work of the life insurance companies. This growth is in the main due to the fact that the population during the same period has increased by only 50 per cent. Toronto Mail and Empire.

#### One Political Murder

Canada has had only one political assassination in history, records an Ottawa record. It occurred on April 7, 1906, when Thomas d'Arcy McGee, Irish-Canadian member of the Dominion Cabinet, was shot in an Ottawa street by a Sel Feiner.

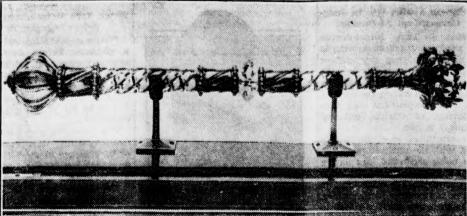

Actor: "What about the potato salad, dear?"

Hubby: "Delicious! Did you buy it yourself?"

"Of course you understand that a potato a week is mostly what we call it—you will get fat."

Potatoes became a staple crop in Europe as a result of the great famine of 1771.

## ANCIENT RELIC TO FIGURE PROMINENTLY IN CORONATION

The ancient crystal mace or sceptre of the City of London is only used in two ceremonies—Coronations and the Swearing-in ceremony of the Lord Mayor of London—and it will appear prominently in the Coronation of King Edward in May 1937. It is 18 inches long, and the shaft and knobs are of crystal set in gold. The head is created under a bold coronet of four crosses, alternating with four fleur-de-lys, each being set with four pearls, and a quatrefoil in the centre near the Arms of France and England painted on velvet. The sceptre is the link with the time when the Kings of England were also Kings of France.

### Tips To Increase Sales

#### Psychology Reveals Faults And Facts About Retail Customers

Dr. Donald A. Laird, head of the Colgate University department of business psychology, gave to university students these tips on increasing sales:

"Sales tips in neat and unbroken stacks do not sell as readily as the same goods in a jumbled stack."

"Three out of four retail customers want to make right turns instead of left in the store, and they want to make turns about every 20 feet."

"The average man probably has so little to go on by way of education and science, it is much better to show him, let him feel and let him see what he wants to buy than to make him think."

"The will buy first, then something which is colored red, then green, then at purple last. His attention shifts about every two or three weeks except when he is especially interested."

"Pictures appeal to him. A small advertisement for a watch increased sales by one-third when a tiny picture of the watch was used."

"It is easier for him to read when black type is used on yellow paper. But the 'dirty' shades of yellow he dislikes more than any other color."

"He is prejudiced against products which have smelly finishes. Wintergreen and peppermint are his favorite odors."

"It is hard for him to believe in himself in stores."

"It is just as difficult for him to see ahead or think ahead."

"He is a creature of habit. Habit, routine, routine, routine, causes him to buy in a routine way."

"Putting difficulties to find out the product of consumers to new products is usually helpful than a smoke laden inference of the best mind in the business."

"Good, well and better when there is only a small quantity on display."

"The Colgate psychologist, whose name is in Hamilton, N.Y., offered the tip during a lecture on psychological surveys for business."

### Guarded Famous Rebel

#### Officer Who Personally Attended Louis Riel's Head

St. Louis, Quebec, Miles, a member of the Royal Northwest Mounted Police from 1882 to 1888 and an officer of the force that personally attended Louis Riel prior to the rebellion of 1885, died yesterday at the age of 70.

He was ordered to guard three nights a week for a month at the time when Riel was imprisoned and guarded Riel the night before the execution.

Why, Son?

The Toronto Globe says now it is that good old bird of verve about the wreck of the Hesperus that is being "debunked." The icebergs going so far as to claim the vessel was sent westward in the ice, and not eastwardly, but why spot a stirring poem that has been the inspiration of many a school electrician at the closing exercises?

Wife: How do you like the potato salad, dear?

Hubby: Delicious! Did you buy it yourself?"

Potatoes became a staple crop in Europe as a result of the great famine of 1771.

### Has Become A Necessity

#### Building Would Be Useless Without Elevator Service

There is an old saying that "you never know the water till the well runs dry." A large portion of the population of New York, accustomed to being waked up and down their apartment, office and hotel buildings, are the educated ones of these. Builders are growing

larger and larger, and it is a cheery prospect to wake up ten to twenty flights of stairs several times a day.

The elevator started its conquest of the world when in 1857 when Elisa James Otis stood on a wooden platform, had himself hoisted some 25 feet by a panting steam engine, and then an awestruck audience witnessed the great invention, which caused the suspension of the elevator was suspended. The contraption did not fall; Mr. Otis's safety device gave the invention the safety it needed for widespread adoption.

The first elevators were hydraulic, and there are still several thousands of them in New York, their mechanism going down into the well many times a day.

New York's longest elevator, therefore the world's is in the Empire State Building, which extends from the basement to the 102nd floor.

In addition to passenger and freight elevators there are two or three hundred thousand dumb waiters in the metropolis conveying garbage and small packages merchandise on up and down—St. Thomas Times-Journal.

### Poultry On Prairies

#### Highest Price Last Year Meant Increase In Demand

Although the poultry population of the three prairie provinces was smaller last year than in 1934, the higher prices paid to the farmers for poultry, resulted in marketings higher than in 1934.

The Department estimated about 70,000,000 maple trees produce sap about eastern Canada but that only about 10,000,000 are tapped.

Nevertheless, the value of last year's sugar and syrup harvest was \$3,532,420, an increase in a year of \$181,820. The industry was started in 1896 at Sault Ste. Marie, Ontario.

Fundamentals Of Money

Graham F. Towers, governor of the Bank of Canada, told the annual meeting of the Commerce Club of Montreal that "a grasp of the fundamentals of money is essential to banking never more essential than they are to-day." In explaining the aims, functions and responsibilities of a central bank, Mr. Towers said university-trained youths are "vitally essential."

A competent teacher was giving a lecture to a class of small children on a canary.

Teacher—Any boy can tell what a canary is, but can I and can't?"

Sharp Boy—Please, Miss, have a bath in a saucer.

Life on earth began in the ocean, and man's body contains the same mineral salts found in the sea.

I've gotta find something to sugar coat it with!

Comes on doc—I know I have to take medicine!

TAX TELLER

THE DOCTOR'S DILEMMA

Talburt in the Washington Daily News.

## Women Police In Poland

### Are Specially Trained And Must Serve Five Years

Poland's blue-uniformed policewomen are making a big hit with children; so much so that many a youngster yells "Police!" instead of "Mama" when she sees a friend. Typical of the new policewomen boy whose red balloon escaped on the boulevard. His screams brought a young policewoman who saw the balloon caught in a wire and promptly snatched up after it.

The women police force was organized in 1923 to help the government's fight against white slavery and the traffic in dangerous drugs.

Chief of the organization is Miss Stanislaw Palaeologue, who was an officer of the Polish army in the war with Soviet Russia. Under her leadership the women police have greater responsibility and opportunity in the field of social welfare.

Their problem of course is simple. If no human beings or other animals are available, it becomes a veritable task to care for the plants until they bear fruit.

The policewomen are recruited from among healthy, unmarried applicants between the ages of 21 and 30.

They must undergo six months of special training, and must sign a contract to serve five years. For four years they are bound to celibacy and should they continue to serve after the four years have elapsed they must wait an additional three years.

Those who sign up at 21 and wait three years must wait until she is 28 before she can marry.

Inasmuch as most of the women police look so attractive, they are often asked if they are prostitutes.

They are told that they turn many a young man's head, this seven-year wait has its disadvantages.

It is already said to have concluded several romances between the women and other girls, but awaiting marriage more promptly when the "one and only" girl hit them may join the police.

### New Road Material

#### Salt Now Used Successfully In Building Of Highways

Salt is being utilized to aid highway building, the Canadian Institute of Mining and Metallurgy, was told.

Use of salt mixed with clay to construct roads was first used in 1926, capable of carrying a daily toll of thousands of cars and heavy traffic.

Now, in the Empire State Building, the salt is being used to stabilize the foundation.

The roadway under construction is smoothed, dampened and rolled and the mixed "salt-stabilized" material placed in layers on the damp base. Roughly one inch of thickness is considered to be adequate. Such "salt-stabilized" roads have been successfully built in Ontario, Quebec and the United States.

The salt is often used just to bind the soil together, but is not the only material used. We are not blaming those who use these two extremes, but we are not able to adequately build roads.

There is a man-made rubber, described in a paper presented by V. A. Coster, Montreal. The rubber, made from the chicle, is superior to natural rubber and age, he said. It could be used for every purpose natural rubber was used and was manufactured on a commercial scale at the rate of 1,000,000 pounds a year.

### Letters Must Be Brief

#### Appeal Issued To Italians To Save Precious Paper

Italians must learn the art of brevity in writing, as a part of their sanctions-defeating program.

"Fewer letters, shorter letters, shorter words, shorter sentences," is the motto of the Italian government.

Nonetheless, the Italian government is still sending out many letters.

The appeal, in part, reads:

"Brevity, please! Before commencing to write a letter, first ask yourself: 'Is it necessary?' If you are not sure, then the letter is not necessary.

"Save time and postage for yourself, and precious paper for the fathoming of the world."

"You must write a letter, sign a document, or send a telegram, but do not do it in a long, drawn-out, wordy way. If you do, you will be wasting paper."

"I am glad it's no longer the fashion to wear a watch with a dress suit."

"Why?"

"Because I never possess both at once."

## Still Be Mosquitoes

### But Plan To Color Them Might Add To Scientific Knowledge

How far a mosquito can fly and remain effective is a question on which there is considerable disagreement. Science knows, in a general way, that the salt-water variety is stronger on the wing than the fresh-water variety, but accurate details are extremely incomplete. The problem is complicated by the fondness of the mosquito for stealing rides.

The women police force was organized in 1923 to help the government's fight against white slavery and the traffic in dangerous drugs.

Chief of the organization is Miss Stanislaw Palaeologue, who was an officer of the Polish army in the war with Soviet Russia. Under her leadership the women police have greater responsibility and opportunity in the field of social welfare.

Their problem of course is simple. If no human beings or other animals are available, it becomes a veritable task to care for the plants until they bear fruit.

The police women are recruited from among healthy, unmarried applicants between the ages of 21 and 30.

They must undergo six months of special training, and must sign a contract to serve five years. For four years they are bound to celibacy and should they continue to serve after the four years have elapsed they must wait an additional three years.

Those who sign up at 21 and wait three years must wait until she is 28 before she can marry.

Inasmuch as most of the women police look so attractive, they are often asked if they are prostitutes.

They are told that they turn many a young man's head, this seven-year wait has its disadvantages.

It is already said to have concluded several romances between the women and other girls, but awaiting marriage more promptly when the "one and only" girl hit them may join the police.

The latest attempt, just announced at the meeting in Atlantic City of the New Jersey Mosquito Extension Association, has photographic aspects. It is proposed to invade a district west of Chicago where insects are especially abundant and to spray them with insecticides of different colors.

By this plan it is hoped that migratory insects will be easily identifiable at a distance and further information as to their movements will be obtained.

On the other hand, the heat waves of summer may be a hindrance to visitors next summer the sum of scientific knowledge may be added to, even if the discomfort of the citizen is increased—New York Herald Tribune.

### Interesting To Know

#### Why Said "For Ever" Has Been Added To Lord's Prayer

Every day the Lord's Prayer is recited by millions of people who are responsible for the addition of those two words "and ever" just before the Amen its close. In the Sermon on the Mount Jesus said: "And when you say 'Our Father, who art in heaven, hallowed be thy name, thy kingdom come, thy will be done, on earth as it is in heaven, for ever and ever. Amen.'"

The addition of those two words "and ever" seems to detract from the meaning of the Amen, but it is not just why these two words are used. We are not blaming those who use these two extremes, but we are not able to adequately build roads.

There is a man-made rubber, described in a paper presented by V. A. Coster, Montreal. The rubber, made from the chicle, is superior to natural rubber and age, he said. It could be used for every purpose natural rubber was used and was manufactured on a commercial scale at the rate of 1,000,000 pounds a year.

A Unifying Force

#### Hon. Vincent Massey Urges Co-operation Of English-Speaking Peoples

Hon. Vincent Massey, Canadian high commissioner to London, issued a plan for continued trading and cultural co-operation between all the members of the English-speaking world.

Addressing the British North American Club, Mr. Massey said:

"At a time when democracy prevails on a dimly lighted portion of the earth it is becoming more interesting as it unifies the force in the empire and the United States of America—countries where one can still say and do as one likes with impunity."

### What's In A Name

#### Plenty If You Have One Like Postmaster At Hayti

The most popular postmaster of Hayti holds a unique world record. Every time he has to append his signature on an official form of notices nearly an extra sheet of notes is required. The signature of the postmaster of Hayti have occasion to write to him they become quite personal, and addressed by him by his Christian name, i.e., "Dad."

"Dad" is the name of the man who has the most difficulty in addressing him by his surname, i.e., "David."

"David" is the name of the man who has the most difficulty in addressing him by his surname, i.e., "David."

The Empire State building is the tallest man-made object in the world.

An illustrated lecture will be held in the United Church on Sunday evening, April 2, at 8 p.m., when the student Choristers of the University of Alberta will give a talk on Scandinavian countries, showing pictures of various places of interest. There will be a small charge made for adults, while children will be admitted free. Funds will go towards the Sunday School.

Mrs. Jones: I understand you've got your divorce, Sally. Did you get any alimony from your husband?

Laundress: No, Mrs. Jones, but he does give me a first-class reference.

Jones—Your office sent me a cook last week."

Employment Office Manager—Yes, that's right.

Jones—Well, it will give me the greatest pleasure if you will dine with me tonight.

First Actress—She's got a head like a door-knob."

Second Actress—What do you mean?

First Actress—Any man can turn it.

Traffic policeman (overstating speed): Didn't you hear me yelling for you to stop?

Motorist—Was that you? I'm sorry. I thought it was only someone run over.

Three sailors were spending their Easter leave in the country. Presently two of them got into a heated argument. The third sailor, who was half-drunk, said: "It's a sort of a *hush*," said one. "Not on your life," replied the other. "It's a kind of a *sheep*."

Finally they called the third party.

"Bill," said the first sailor, "we're a *heifer*—is it a pig or a *sheep*?"

"Bill," said the second sailor, "we're not *heifers*—we're *sheep*."

"To tell you the truth, shipmates," he said, "I dunno much about poultry."

## Snicklefritz

Foreman: "What's up, Bill, 'urt you?"

Bill: "Not gotta nail in my boot."
